

Fees for authorization/renewal/variations of veterinary medicinal products in Romania, according to the provisions of Order ANSVSA No.174/2007 (lei)	
261. Authorization of veterinary medicinal products containing new active substances proposed through the mutual recognition procedure or decentralized procedure in Romania as reference member state, to which the following will be added, according to the case: - for each target food producing species - for each target species for pet animals	13,671.00 755.00 475.00
262. Authorization of veterinary medicinal products resulted from new associations of known active substances (fixed combinations), proposed through the mutual recognition procedure or decentralized procedure in Romania as reference member state, to which the following will be added, according to the case: - for each target food producing species - for each target species for pet animals	12,175.00 755.00 475.00
263. Authorization of veterinary medicinal products containing well established use substance proposed through mutual recognition procedure or decentralized procedure in Romania as reference member state.	10,679.00
264. Authorization of generic medicinal products through the mutual recognition procedure or decentralized procedure in Romania as reference member state	9,183.00
265. Authorization of medicinal products containing new active substance proposed through the mutual recognition procedure or decentralized procedure in Romania as interested member state, first wave	13,297.00
266. Authorization of medicinal products resulted from new associations of known active substances (fixed combinations) proposed through the mutual recognition procedure or decentralized procedure in Romania as interested member state, first wave	12,923.00
267. Authorization of medicinal products containing well established use substance proposed through the mutual recognition procedure or decentralized procedure in Romania as interested member state, first wave	11,053.00
268. Authorization of generic medicinal products through the mutual recognition procedure or decentralized procedure in Romania as interested member state, first wave	10,305.00
269. Authorization of veterinary medicinal products containing new active substance, authorized in the European Union through the national procedure and proposed through the "repeat use" procedure in Romania as interested member state, second wave	6,634.00

270. Authorization of veterinary medicinal products resulted from new associations of known active substances (fixed combinations), authorized in the European Union through the national procedure and proposed through “repeat use” procedure in Romania as interested member state, second wave	5,609.00
271. Authorization of veterinary medicinal products containing well established use substance authorized in the European Union through the national procedure and proposed through “repeat use” procedure in Romania as interested member state, second wave	5,609.00
272. Authorization of generic veterinary medicinal products authorized in the European Union through the national procedure and proposed through “repeat use” procedure in Romania as interested member state, second wave	4,487.00
273. Evaluation of technical dossier for biocidal products, for authorization through the mutual recognition procedure.	1,830.00
274. Evaluation of technical dossier for low risk biocidal products.	914.00
275. Evaluation of application for type IA variation	344.00
276. Evaluation of application for type IB variation	788.00
277. Evaluation of application for type II variation	1,036.00
278. Marketing authorization for parallel imports	840.00
279. Authorization of veterinary medicinal products containing new active substance through the national procedure, to which the following will be added according to the case: - for each target food producing species - for each target species for pet animals	2,448.00 240.00 168.00
280. Authorization of veterinary medicinal products resulted from new associations of known active substances (fixed combinations), through the national procedure, to which the following will be added according to the case: - for each target food producing species - for each target species for pet animals	2,112.00 240.00 168.00
281. Authorization of veterinary medicinal products containing well established use substance proposed through the national procedure.	2,112.00
282. Authorization of generic veterinary medicinal products through the national procedure.	1,944.00
283. Authorization of homeopathic products with therapeutic indications, through national procedure.	1,608.00
284. Notification of veterinary medicinal products without therapeutic indications, through national procedure.	360.00
285. Evaluation of application for type IA variation, through national procedure.	240.00
286. Evaluation of application for type IB variation, through national procedure.	336.00
287. Evaluation of application for type II variation, through national procedure.	480.00

288. Evaluation of applications concerning change of design and label on the outer and immediate package, the package leaflet and the SPC of veterinary medicinal products, others then those resulted from type IA, IB and II variations, through national procedure.	336.00
289. Renewal of veterinary medicinal products, through national procedure.	552.00
290. Evaluation of technical dossier for biocidal products, for authorization through the national procedure.	816.00
291. Evaluation of technical dossier for low risk biocidal products, for authorization through the national procedure.	624.00
292. Approval of advertising material for biological products/ medicines/feeding stuffs/others veterinary products, through national procedure.	96.00
293. Duplicate of marketing authorization, through national procedure.	58.00
294. Specific advice as regards medicinal products and other veterinary products/hour.	24.00
